Notes to The Condensed Consolidated Interim Financial Information

The consideration transferred in the acquisition is generally measured at fair value, as are the identifiable net assets acquired. Any goodwill that arises is tested annually for impairment.

Any gain on bargain purchases is recognized in statement of profit or loss and other comprehensive income immediately. Transactions costs are expensed as incurred, except if related to the issue of debt or securities.

The consideration transferred does not include amounts related to the settlement of pre-existing relationship. Such amounts are generally recognized in consolidated statement of profit or loss and other comprehensive income.

Any contingent consideration payable is measured at fair value at the acquisition date. If the contingent consideration is classified as equity, then it is not re-measured and settlement is accounted for within equity. Otherwise, subsequent changes in the fair value of the contingent consideration are recognized in consolidated statement of profit or loss and other comprehensive income.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. This means that no gain or loss from these changes should be recognized in profit or loss. It also means that no change in the carrying amounts of the subsidiary's assets (including goodwill) or liabilities should be recognized as a result of such transactions.

On loss of control, the parent-subsidiary relationship ceases to exist. The parent no longer controls the subsidiary's individual assets and liabilities. Therefore, the parent company:

- 1- Derecognizes the assets and liabilities of the former subsidiary from the consolidated statement of financial position.
- 2- Recognizes any investment retained in the former subsidiary at its fair value when control is lost subsequently accounts for it and for any amounts owed by or to the former subsidiary in accordance with relevant IFRS.
- 3- Recognizes the gain or loss associated with the non-controlling interest.

Consolidated financial statements are prepared for the subsidiaries to the same financial year of the parent company and using the same accounting policies adopted by the parent company. If one of the subsidiary use accounting policies other than those adopted in the consolidated financial statements for similar transactions and events in similar circumstances, appropriate adjustments are made to that Group subsidiary's financial statements, in preparing the consolidated financial statements to ensure conformity with the International Financial Reporting Standards.

Non-controlling interest are measured at their proportionate share of the acquirer's identifiable net assets at the acquisition date.

Non-controlling interests represent the portion not owned by the Company relating to ownership of the subsidiaries.

Balances, transactions and unrealized profits and expenses resulted from transactions within the group are eliminated when preparing these consolidated financial statements.

16) Financial Risk Management

Market price risk

Equity price risk arises from financial assets at fair value through other comprehensive income that is held to meet the partially unfunded portion of the Group's liabilities as well as investments at fair value through statement of income. The group's management monitors the debt and securities portfolio in its market-based investment portfolio. Material investments are managed in the portfolio on an individual basis and the Risk Management Committee approves all purchases and sale decisions.

Sensitivity analysis for stock price risk

A 5% change in the fair value of securities at the reporting date would result in an increase (decrease) in equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, particularly foreign exchange rates, remain constant.

Fair value hierarchy

The table below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities

Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices) Prices quoted in active markets for similar instruments or through the use of valuation model that includes inputs that can be traced to markets, these inputs good be defend directly or indirectly.

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The following table provides information about how the fair value of these financial assets and financial liabilities is determined (valuation methods and inputs used):

Financial Assets	Fair Value as at		Fair value hierarchy	Valuation techniques and key inputs	Significant unobservable inputs	Relationship of unobservable inputs to fair value
	June 30, 2025 (Reviewed not audited) JD	December 31, 2024 (Audited) JD				
Financial assets at fair value						
Financial assets at fair value through profit or loss:						
Quoted Shares	2,930,932	2,595,292	Level 1	Financial Markets	Not applicable	Not applicable
	2,930,932	2,595,292				
Financial assets at fair value through other comprehensive income:

Unquoted Shares	87,932	187,932	Level 3	Through using the equity method and the latest available financial information	Not applicable	Not applicable
	3,388,998	3,114,983				
Total financial assets at fair value	6,319,930	5,710,275
